Preface

The Fast Abstracts track enables the publication of short two-page papers that describe late breaking results or works in progress. This TAIC PART track is also an ideal venue for research ideas that are in their formative stages. Although fast abstracts are not published in the IEEE conference proceedings, they are reviewed by the TAIC PART programme committee and authors present their papers alongside the other TAIC PART authors.

The abstracts reproduced here are also available for download from the conference Web Site - http://www2008.taicpart.org.

**Marc Roper** (Conference chair)

**Gregory Kapfhammer** (Programme co-chair)

**Leonardo Bottaci** (Programme co-chair)
TAIC PART 2008 Programme Committee

Giuliano Antoniol, University of Sannio, Italy
Paul Baker, Motorola, UK
David Binkley, Loyola College Maryland, USA
Leonardo Bottaci, University of Hull, UK
Myra Cohen, University of Nebraska-Lincoln, USA
Paul Gerrard, Gerrard Consulting, UK
Mark Harman, Kings College London, UK
Mike Hennell, LDRA Software Technology, UK
Rob Hierons, Brunel University, UK
Gregory Kapfhammer, Allegheny College, USA
Yvan Labiche, Carleton University, Canada
Eev Littlewood, City University London, UK
Wassim Masri, American University of Beirut, Lebanon
Phil McMinn, University of Sheffield, UK
Atif Memon, University of Maryland, USA
Filippo Ricca, University of Genova, Italy
Marc Roper, University of Strathclyde, UK
Clive Stewart, IBM, UK
Hasan Ural, University of Ottawa, Canada
Contents

Analysing the Impact of Change on State Machine Test Sets
Sarah Salahuddin and Kirill Bogdanov

Generating Input Documents for Testing XML Queries with ToXgene
Dae S. Kim-Park, Claudio de la Riva, Javier Tuya, José García-Fanjul

Validation Based on Observation of the Behavior of Distributed Components
Tatiane Macedo Prudencio Lopes and Clovis Torres Fernandes

Model-Based Mutation Testing of Firewalls
Tugkan Tuglular and Fevzi Belli

Co-testability Transformation
Phil McMinn

Prioritizing Test Suites by Finding Hamiltonian Paths: Preliminary Studies and Initial Results
Suvarshi Bhadra and Gregory M. Kapfhammer

A Concept for Hybrid Fault Injection in Distributed Systems
Christian Trödhandl and Bettina Weiss

Adaptive Path Selection
Matthieu Petit and Phil McMinn

Finding Test Data on the Web
Mustafa Bozkurt and Mark Harman

Efficient Test Case Prioritization in Regression Testing
Prashant Malangave and Dinesh B. Kulkarni

Calibrating Program Slicing Metrics for Practical Use
David Bowes, Steve Counsell, and Tracy Hall

A Tool for Integrated Test Driven Development - iTDD
Wolfgang Schwaiger and Martin Kropp
