### Chapter 1 NMR — Basic Principles

|   |    |
|---|----|
| 1.1. The Phenomenon of Nuclear Magnetic Resonance.....  | 1  |
| 1.2. NMR Spectra and their Parameters.....  | 7  |
| 1.3. Simplification of NMR Spectra.....   | 20 |
| 1.4. Analysis of NMR Spectra.....   | 23 |
| 1.5. Some Hints on the Mechanisms of Relaxation and the<br>Nuclear Overhauser Effect.....             | 29 |
| 1.6. Physico-Chemical Aspects of the NMR.....   | 32 |
| 1.6.1. The role of exchange processes in the NMR<br>Physico-Chemical studies.....                     | 33 |
| 1.6.2. Conditions of fast and slow exchange.....  | 36 |
| 1.6.3. Mathematical models of the concentration dependence<br>of chemical shifts (fast exchange)..... | 38 |
| 1.6.4. Mathematical formalism of the NMR studies of<br>slow reaction kinetics.....                    | 42 |
| 1.7. Conclusion to Chapter 1.....   | 44 |

### Chapter 2 Experimental Techniques Employed in NMR

|  |    |
|--|----|
| 2.1. Introduction.....   | 45 |
| 2.2. Principles of Fourier Transform NMR spectroscopy.....                       | 45 |
| 2.2.1. Free induction decay and spin-echo.....                                   | 50 |
| 2.2.2. Fourier Transform NMR.....  | 55 |
| 2.2.3. Problems and advantages of practical FT NMR<br>spectroscopy.....          | 57 |
| 2.3. Special Features of the Physico-Chemical NMR Experimental<br>Technique..... | 66 |
| 2.3.1. Temperature control of a sample.....                                      | 66 |
| 2.3.2. Sensitivity.....  | 68 |
| 2.4. Routine of a Typical PMR Analysis of an Organic Compound.....               | 69 |
| 2.4.1. Solvents.....   | 69 |
