Einget. 14. Mai 2013

Dissertation

Establishment of the whole-process orientated architectural practice as an approach to the sustainable architecture

A comparative study between German and Chinese
architectural practice

Submitted at the

Faculty of architecture and planning, Vienna University of Technology
in partial fulfillment of the requirements for the degree of
Doctor of Technical Science

Under supervision of

Univ. Prof. Mag. arch. Françoise-Hélène Jourda
Department for Spatial and Sustainable Design
Institute of Architecture and Design

and

Univ. Prof. Dipl.-Ing. Architect Dietmar Wiegand
Real Estate Development and Management

By

Dipl.-Ing. Yang Wang

List of abbreviations	IV
List of figures	V
List of tables	VII
1. Introduction	1
1.1 Origins of the concern	1
1.2 Problem formulation and research goals	5
1.3 Current state of research	7
1.3.1 Related research in China	7
1.3.2 Related research in Germany	14
1.4 Structure of the thesis	15
2. The origins of the architectural profession	17
2.1 The origins of the architectural profession in Europe	17
2.2 Establishment of the German system of professional architects	20
2.2.1 Development of the German architectural profession	20
2.2.2 Professional architects' system in Germany	22
2.2.3 Current status of professional architects in Germany	25
2.3 From Western to Eastern - The development of architectural profession in China	
2.3.1 From the traditional "construction" to the western "architecture"	32
2.3.2 Certified public architect system in China	36
2.3.2.1 Classification and Practice	36
2.3.2.2 Examination and Registration	38
2.3.3 The four generations of Chinese architects	40
2.3.3.1 The first generation	41
2.3.3.2 The second generation	44
2.3.3.3 The third generation	46
2.3.3.4 The fourth generation	47
2.3.3.5 Comparison	49
2.3.4 Draftsmen – The current status of professional architects in China	50
	55
2.4 Summary	
3. Comparison of professional system of architects between Germany and China	56
3.1 Items to be compared	56
3.2 China's understanding of architecture	59
3.3 Rights and responsibilities	59
3.3.1 German architects' rights and responsibilities	60
3.3.2 Chinese architects' rights and responsibilities	

3.4 Professional practice scope	65
3.4.1 The professional practice scope of German architects	65
3.4.2 The professional practice scope of Chinese architects	66
3.5 An embarrassing role - Chinese supervision engineer	68
3.5.1 Establishment and development of the supervision engineer system in China	68
3.5.2 The service scope of Chinese supervision engineers	69
3.5.3 Weakness of Chinese supervision engineer system	71
3.6 Architects' Business operation in Germany and China	74
3.6.1 Type of architect' firms in Germany and China	74
3.6.1.1 Small and middle scale architects' offices in Germany	74
3.6.1.2 Flourishing of diverse architecture firms with various scale in China	75
3.6.2 Obtaining Contracts	77
3.6.2.1 Methods of obtaining contracts in Germany	77
3.6.2.2 Bidding and tendering system in China	80
3.6.3 Architect's fee	80
3.6.3.1 Architect's fee in Germany	83
3.6.3.2 Architect's fee in China	83
4. Interviews	85
4.1 About the 30 interviews	85
4.2 The interviews with German architects	85
4.2.1 The questionnaire	86
4.2.2 The interviewees	87
4.2.3 The interview summary	91
4.3 The interview with Chinese architects	91
4.3.1 The questionnaire	92
4.3.2 The interviewees	92
4.3.3 The interview summary	98
5. Summary of the comparative study	
6. Redefinition and expansion of the Chinese architectural service	101
6.1 Redefinition of the role	101
6.1.1 Requirements of professional competence	101
6.1.1.1 The generalist	101
6.1.1.2 Cooperation and team spirit	102
6.1.1.3 Organizational competence	102
6.1.1.4 Learning capacity	102
6.1.1.5 Market adaptive capacity	103
6.1.1.6 Control of the orientation of architectural value	103
6.1.2 The social role	103
6.1.3 Building the local architectural theory	105
6.1.4 Rebuilding the work ethic	107

6.2 Whole-Process orientated architectural practice	109
6.2.1 Process flow of construction projects in China	109
6.2.2 The first phase - Preliminary planning	112
6.2.2.1 Problem statement	112
6.2.2.2 Specialty and advantage of architects	112
6.2.2.3 Architectural service in the preliminary phase	113
6.2.2.4 Output from architects	116
6.2.2.5 Summary and comparison	116
6.2.3 The second phase - Schematic design	117
6.2.3.1 Problem statement	118
6.2.3.2 Objective and content of this phase	118
6.2.3.3 Architectural service in schematic design phase	119
6.2.3.4 Output from architects	
6.2.3.5 Summary and comparison	122
6.2.4 The third phase - Design development	125
6.2.4.1 Problem statement	125
6.2.4.2 Objective of design development	125
6.2.4.3 Architectural service in the design development	126
6.2.4.4 Output from architects	
6.2.4.5 Summary and comparison	126
6.2.5 The fourth phase - Construction design phase	127
6.2.5.1 Problem statement	128
6.2.5.2 Objective and content of construction design	130
6.2.5.3 Architectural service in construction design	131
6.2.5.4 Output from architects	
6.2.5.5 Summary and comparison	133
6.2.6 The fifth phase - The bidding phase	135
6.2.6.1 Problem statement	135
6.2.6.2 Advantages for architects to participate in bidding	135
6.2.6.3 Architectural service in the bidding phase	137
6.2.6.4 Output from architects	
6.2.6.5 Summary and comparison	138
6.2.7 The sixth phase - Construction management phase	139
6.2.7.1 Problem statement	139
6.2.7.2 Necessity of architects participating in construction management	140
6.2.7.3 Architectural service in construction management	141
6.2.7.4 Output from architects	
6.2.7.5 Summary and comparison	143
6.2.8 The seventh phase - Return visit and summary	144
6.3 Service expansion and sustainable development	145
6.4 Architects education	146
7. Open questions and future research	148
