

# 1<sup>st</sup> International Conference on Functional Integrated *nano* Systems

03 - 05 December 2014  
Graz/Austria

We thank all  
participants for making  
nanoFIS 2014 that big  
success!

advances in micro- and nanoelectronics in particular in the topics **Advanced Functional Materials**,  
"Nanosensors", "3D-System Integration & Packaging", "Reliability" and "Innovative Manufacturing  
Processes" were presented in 48 talks and 45 poster contributions.

The organizers were able to attract world famous scientists in the field of nanoelectronics: **Zhong Lin Wang** from Georgia Institute of Technology, Atlanta, US, **Jong Min Kim** from University of Oxford in UK, **Lars Samuelson** from Lund University in Sweden and many more >> [nanoFIS 2014 Program](#)

Status and future of the European Micro- and Nanoelectronics industry were addressed in the very interesting panel discussion "**Airbus of Chips – Feasible European Reality or Science Fiction?**"

See the whole summary of **nanoFIS 2014** >> [Summary](#)

The participation of several **companies** in the **exhibition** demonstrated the industrial relevance of the nanoFIS conference.

Due to the promising success of the first nanoFIS 2014 this conference will be organized in the future as periodic **European forum for smart system development and system integration in Micro- & Nanoelectronics**. The date for the next **nanoFIS** conference will be announced very soon!

We thank **all** participants for making this conference such a big success!

Sincerely,  
your **nanoFIS 2014** Organizing Committee  
Anton Köck, Reinhold Ebner, Margit Malatschnig
