## THE FOUR-DAY CLOSING EVENT OF THE ARTISTIC RESEARCH PROJECT

INTRA SPACE: the reformulation of architectural space as a dialogical aesthetic – explores how interactions between, across and beyond humans and nonhumans can be experimentally embodied, aesthetically reformulated and theoretically challenged in current and future configurations. Practicing virtual conditions examines the challenges and potentials of an embodied and experimentally investigated concept of INTRA SPACE, thus critically considering engagements, perceptions and imaginable alternatives in the negotiation with human and nonhuman agencies and their spatial, temporal and transversally entangled spheres.

The four-day program includes a lecture by Nanna Verhoeff and a performance screening, accompanied by discursive research sessions offering distinct perspectives and insights into the research work initiated by Esther Balfe with Diane Shooman, Ursula Frohne with Birk Weiberg, and Gabrielle Cram. The final day starts with a picnic and tour through the experimental framework and assembles responses and conversations with Nanna Verhoeff, Clemens Apprich, Vera Bühlmann, Dennis Del Favero, Sabine Folie, Ursula Frohne, Paolo Petta, Arno Ritter, Diane Shooman, Wolfgang Tschapeller, Birk Weiberg. The discussion will be moderated by Gabrielle Cram.

INTRA SPACE will remain open for individual visits by appointment during the month of April.
