ACM Order Number 592081

Foreword

It is our great pleasure to welcome you to the 6th *Workshop on Software Quality – WoSQ'08*. As with previous workshops, the workshop is intended for researchers in the area of software quality and aims to encourage discussion on their research progress and to explore future directions. The goals of the working session are to exchange experience, to discover areas of mutual collaboration and to envision future trends in the field of software quality. To achieve this, the workshop aims to bring together academic, industrial and commercial communities interested in software quality topics to discuss the different technologies being defined and used in the software quality area.

The workshop had 10 papers accepted for presentation and discussion. We are pleased to have gathered a truly international community with papers from Austria, Australia, Canada, Germany, Japan, Pakistan, United Kingdom and the United States. All papers had two reviews.

We would like to thank all the people who have been involved in organizing this workshop, all the authors who submitted papers, and the ICSE organizers for their support.

We hope that you will find this program interesting and thought-provoking and that the workshop will provide you with a valuable opportunity to share ideas with other researchers and practitioners from institutions around the world.

Barry Boehm
Sunita Chulani
June Verner

Organization Listing

Keynote Addresses

Quality Software Development: What do we need to improve in the software development process?
 (Page 1)
 June M. Verner (*NICTA*)

Cultural Influences and Differences in Software Process Improvement Programs (Page 3)
 Bernard Wong (*University of Technology, Sydney*)
 Sazzad Hasan (*University of Technology, Sydney*)

Session 1

Developing a SSE-CMM-based Security Risk Assessment Process for Patient-Centered Healthcare Systems (Page 11)
 LiGuo Huang (*Southern Methodist University*)
 Xu Bai (*Southern Methodist University*)
 Suku Nair (*Southern Methodist University*)

An Approach for Continuous Inspection of Source Code (Page 17)
 Christian R. Prause (*Fraunhofer für Angewantke*)
 Stefan Apelt (*Fraunhofer für Angewantke*)

Investigating Test-and-Fix Processes of Incremental Development Using Hybrid Process Simulation (Page 23)
 He Zhang (*University of New South Wales / National ICT Australia*)
 Ross Jeffery (*University of New South Wales / National ICT Australia*)
 Liming Zhu (*University of New South Wales / National ICT Australia*)

Session 2

Managing Quality Requirements Using Activity-Based Quality Models (Page 29)
 Stefan Wagner (*Technische Universität München*)
 Florian Deissenboeck (*Technische Universität München*)
 Sebastian Winter (*Technische Universität München*)

Towards a Generic Model for Software Quality Prediction (Page 35)
 Zeeshan Ali Rana (*Lahore University of Management Sciences*)
 Shafay Shamil (*Lahore University of Management Sciences*)
 Mian Muhammad Awais (*Lahore University of Management Sciences*)

A QoS-based Service Acquisition Model for IS Services (Page 41)
 Xian Chen (*University of Alberta*)
 Paul G. Sorenson (*University of Alberta*)

Session 3

An Effort and Time Based Measure of Usability (Page 47)
 Dan Tamir (*Texas State University*)
 Oleg V. Komogortsev (*Texas State University*)
 Carl J. Mueller (*Texas State University*)

A Metric-based Approach for Reconstructing Methods in Object-Oriented Systems (Page 53)
 Tatsuya Miyake (*Osaka University*)
 Yoshiki Higo (*Osaka University*)
 Katsuro Inoue (*Osaka University*)

Ontology-Supported Quality Assurance for Component-Based Systems Configuration (Page 59)
 Stefan Biffl (*Vienna University of Technology*)
 Thomas Moser (*Vienna University of Technology*)
 Richard Mordinyi (*Vienna University of Technology*)
 Dindin Wahyudin (*Vienna University of Technology*)
