11	List of Contributors	xiii
12		
13	About the Contributors	xv
14		
15	Foreword	xix
16		
17	Preface	xxi
18		
19	Acknowledgements	xxv
20		
21	List of Abbreviations	xxvii
22		
23		
24	I Cellular Mobile Systems	1
25		
26	1 Introduction to Radio and Core Networks of UMTS	5
27	<i>Philipp Svoboda and Wolfgang Karner</i>	
28	1.1 UMTS Network Architecture	7
29	1.2 UTRAN Architecture	9
30	1.2.1 UTRAN Protocol Architecture	9
31	1.2.2 Physical Layer Data Processing in the UTRAN Radio Interface	13
32	1.3 UMTS PS-core Network Architecture	14
33	1.4 A Data Session in a 3G Network	18
34	1.4.1 The UMTS (PS-core) Protocol Stack	19
35	1.4.2 The Protocols	19
36	1.4.3 Bearer Speed in UMTS	22
37	1.5 Differences between 2.5G and 3G Core Network Entities	23
38	1.5.1 GPRS Channels	24
39	1.5.2 GPRS Core Network Architecture	25
40	1.5.3 The GPRS Protocol Stack	25
41	1.5.4 Bearer Speed in GPRS and EDGE	27
42	1.6 HSDPA: an Evolutionary Step	27
43	1.6.1 Architecture of HSDPA	28
44	1.6.2 Difference between UMTS and HSDPA	29
45	1.6.3 Transport and Control Channels	30
46	References	32
47		

01	II Analysis and Modelling of the Wireless Link	35
02		
03	2 Measurement-based Analysis of UMTS Link Characteristics	39
04	<i>Wolfgang Karner</i>	
05		
06	2.1 Measurement Setup	40
07	2.1.1 General Setup	40
08	2.1.2 Mobility Scenarios	42
09	2.2 Link Error Analysis	46
10	2.2.1 Link Error Probability	46
11	2.2.2 Number of erroneous TBs in TTIs	48
12	2.2.3 TTI-burstlength, TTI-gaplength	48
13	2.2.4 TB Error Bursts, TB Error Clusters	50
14	2.2.5 The Influence of TPC on Link Error Characteristics	52
15	2.2.6 Statistical Dependency between Successive Gaps/Bursts	54
16	2.2.7 Block Error Ratio (BLER)	55
17	2.3 Dynamic Bearer Type Switching	56
18	2.3.1 Measurement-based Analysis of Dynamic Bearer Type Switching	57
19	References	60
20		
21		
22	3 Modelling of Link Layer Characteristics	61
23	<i>Wolfgang Karner</i>	
24		
25	3.1 Modelling Erroneous Channels – A Literature Survey	61
26	3.2 Link Error Models for the UMTS DCH	66
27	3.2.1 Link Error Modelling – ‘Dynamic’ Case	67
28	3.2.2 Link Error Modelling – ‘Static’ Case	69
29	3.3 Impact of Channel Modelling on the Quality of Services for Streamed Video	75
30	3.3.1 Compared Models	76
31	3.3.2 Experimental Setup	76
32	3.3.3 Simulation Results for H.264 Encoded Video over Error Prone Links	78
33	3.4 A Dynamic Bearer Type Switching Model	83
34	3.4.1 Four-state Markov Model	83
35	3.4.2 Enhanced Four-state Model	84
36	References	86
37		
38		
39	4 Analysis of Link Error Predictability in the UTRAN	89
40	<i>Wolfgang Karner</i>	
41		
42	4.1 Prediction of Low Error Probability Intervals	90
43	4.1.1 Detection of Start of Intervals	90
44	4.1.2 Interval Length L_i	91
45	4.2 Estimation of Expected Failure Rate	92
46	References	95
47		

01	III Video Coding and Error Handling	97
02		
03	5 Principles of Video Coding	101
04	<i>Olivia Nemethova</i>	
05		
06	5.1 Video Compression	101
07	5.1.1 Video Sampling	101
08	5.1.2 Compression Mechanisms	103
09	5.1.3 Structure of Video Streams	107
10	5.1.4 Profiles and Levels	108
11	5.1.5 Reference Software	108
12	5.2 H.264/AVC Video Streaming in Error-prone Environment	109
13	5.2.1 Error Propagation	109
14	5.2.2 Standardized Error Resilience Techniques	110
15	5.2.3 Alternative Error Resilience Techniques	111
16	5.3 Error Concealment	112
17	5.3.1 Spatial Error Concealment	113
18	5.3.2 Temporal Error Concealment Methods	115
19	5.4 Performance Indicators	118
20	References	120
21		
22		
23	6 Error Detection Mechanisms for Encoded Video Streams	125
24	<i>Luca Superiori, Claudio Weidmann and Olivia Nemethova</i>	
25	6.1 Syntax Analysis	126
26	6.1.1 Structure of VCL NALUs	126
27	6.1.2 Rules of Syntax Analysis	128
28	6.1.3 Error-handling Mechanism	131
29	6.1.4 Simulation Setup	133
30	6.1.5 Subjective Quality Comparison	134
31	6.1.6 Detection Performance	135
32	6.2 Pixel-domain Impairment Detection	137
33	6.2.1 Impairments in the Inter Frames	137
34	6.2.2 Impairments in the Intra Frames	138
35	6.2.3 Performance Results	139
36	6.3 Fragile Watermarking	140
37	6.4 VLC Resynchronization	147
38	6.4.1 Signalling of Synchronization Points	147
39	6.4.2 Codes for Length Indicators	149
40	6.5 From Error Detection to Soft Decoding	151
41	6.5.1 Sequential CAVLC Decoder	152
42	6.5.2 Additional Synchronization Points	153
43	6.5.3 Postprocessing	154
44	6.5.4 Performance	155
45	References	157
46		
47		

01	IV Error Resilient Video Transmission over UMTS	159
02		
03	7 3GPP Video Services – Video Codecs, Content Delivery Protocols and Optimiza-	
04	tion Potentials	163
05	<i>Thomas Stockhammer and Jiangtao Wen</i>	
06	7.1 3GPP Video Services	163
07	7.1.1 Introduction	163
08	7.1.2 System Overview	164
09	7.1.3 Video Codecs in 3GPP	166
10	7.1.4 Bearer and Transport QoS	169
11	7.1.5 QoS using Video Error Resilience	171
12	7.2 Selected QoS Tools – Principles and Experimental Results	171
13	7.2.1 3G Dedicated Channel Link Layer	171
14	7.2.2 Experimental Results for Conversational Video	173
15	7.2.3 Experimental Results for Moderate-delay Applications	175
16	7.2.4 System Design Guidelines	177
17	7.3 Selected Service Examples	178
18	7.3.1 Multimedia Telephony Services	178
19	7.3.2 Multimedia Download Delivery	180
20	7.3.3 Multimedia Streaming Services over MBMS	181
21	7.4 Conclusions	184
22	References	184
23
