The Saigon River has an important route in the

LEASE OF LIFE

A NEW
A dramatic installation of a series of elevated 'lilypad' dining platforms covered by distinctive bespoke sun and rain umbrellas, known 'Bluebells', animate the water's edge. Illuminated at night in a variety of colours, the Bluebell umbrellas and their reflection in the Singapore River are delightfully reminiscent of an array of traditional Chinese lanterns arranged to celebrate the Chinese mid-autumn festival.
Traditional Chinese lanterns are strung up along the Chinese mid-level walkway, adding a festive touch to the environment. The Riverfront is a bustling area of shops, restaurants, and entertainment, with a mix of traditional and modern elements.

The Riverfront is a popular destination for locals and tourists alike. The river is lined with shops and restaurants, offering a variety of dining options. The area is also known for its vibrant nightlife, with bars and clubs open late into the night.

Another challenge was to find ways to mitigate the heat in Singapore's tropical climate. Traditional solutions such as air-conditioning are not always effective, and the city is working on innovative ways to cool the environment and make it more pleasant for residents and visitors alike.
