Acknowledgements

This is a reprint of my diploma thesis which was started at the Department of Geomatics, the University of Melbourne, during my 5-month stay in Australia. I want to thank all the people that supported me and made my time such a pleasurable experience.

First I want to thank all the people for the great time at the Corporate Research Center for Spatial Information (CRCSI), where I had my workplace. Special thanks go to Sue Hope for helping me out of some serious dead ends. Thanks go also to Matt Duckham and Lars Kulik for their valuable comments. I am particularly grateful to Lars, who took a lot of time for discussing my work and problems. Further thanks go to my colleagues and friends with whom I have worked on the shared-ride trip planning project. It was very exciting to work with Lin Jie Guan and Yun Hui Wu, giving me the chance to get in touch with China while spending my time in Australia. Furthermore I want to thank 'Uncle' Carlos Vieira for all the good times we had, and for sharing his valuable experience.

ISBN 978-3-901716-37-9 GeoInfo Series Vienna

I want to express my gratitude to my thesis supervisors. I want to thank Prof. Andrew Frank in particular for supporting me during the preparation phase of my stay in Australia, which helped me so much. Special thanks go to my supervisor in Australia, Dr. Stephan Winter. I want to thank him for giving me the chance to work on this exciting project, and for making it such a great experience, both academically and personally.

Finally I get to thank my parents for their love and support through all my life. Thanks go also to my sisters Eva and Ilse for always being there for me. To Ilse I'm also thankful for

correcting grammar and style of this thesis.

Contents

1	Introduction	1
1.1	Motivation	1
1.2	Goal and Hypothesis	4
1.3	Methodology	4
1.4	Contribution	5
1.5	Organization of this Thesis	5
2	Literature Review	7
2.1	Related Projects in Ride Sharing	7
2.1.1	Operating Car Sharing Services	7
2.1.2	Related Research and Industry Projects	8
2.2	Wireless Sensor Networks	9
2.2.1	Geosensor Networks	9
2.2.2	Mobile Ad-Hoc Geosensor Networks	10
2.2.3	Communication Strategies in Geosensor Networks	12
2.3	Shared-Ride Trip Planning	13
2.3.1	Concepts	13
2.3.2	Route Choice Strategy	14
2.3.3	Mobility Model for Simulation	14
2.4	Network Algorithms and Graphs	17
2.4.1	Basic Graph Theory	17
