

Joachim Luitz et al. (Eds.)

DFTEM 2006 – bringing together two communities

International Conference on
Density Functional Theory and
Transmission Electron Microscopy

April 21 - 23, 2006
Vienna / Austria

Supported by Magistrat der Stadt Wien, bm:bwk and EMS

Edited by
Joachim Luitz, Cécile Hébert, Kerstin Weinmeier,
Peter Blaha, Claudia Ambrosch-Draxl and Peter Schattschneider

DFTEM 2006 - bringing together two communities

Proceedings of the International Conference on
Density Functional Theory and Transmission Electron Microscopy
April 21 - 23, 2006, Vienna / Austria

Editio Amici – Physicae et chimicae solidorum amici
Beatrixgasse 26/86, A-1030 Wien / AUSTRIA

Cover design ©2006 by Larissa Cerny, larissacerny.com

ISBN 3-902548-00-2 (978-3-902548-00-9)

Contents

Joachim Luitz DFTEM 2006 – bringing together two communities	i
Peter Blaha Karlheinz Schwarz	iii
Cécile Hébert Bernard Jouffrey	v
Organization	vii
Organizing Committee	vii
Program Committee	viii
I Talks	
Lucia Reining The inverse dielectric function: theoretical approaches and contributions to theory from experiment	3
Matthias Scheffler Towards an exact treatment of exchange and correlation in materials	4
Lijun Wu Charge distribution in MgB_2 , AlB_2 and $\text{Mg}_x\text{Al}_{1-x}\text{B}_2$ using quantitative electron diffraction and DFT calculations	5
John J. Rehr Real Space Calculations of Electron-Energy Loss Spectra	8
Marco Schowalter Computation of mean inner Coulomb potentials for technological important semiconductors, Au and amorphous carbon	11
David A. Eustace ELNES as a Probe of Magnetic Order	15

Frank de Groot EELS spectral shapes with the charge transfer multiplet approach	19
Mark P. Oxley Spectroscopic image formation in high resolution scanning transmission electron microscopy	22
Georg K. H. Madsen Automated bandstructures. Finding the heavy Fermion material FeSb ₂ and the thermoelectric material LiZnSb.	26
Jun Yuan Density Function Theory Guided Analytical Electron Microscopy in Nanomaterial Science	28
Isao Tanaka First principles calculations of ELNES	31
Peter Blöchl Analysis and Design of Materials-Processes for Future Transistors	35
Klaus Leifer Quantitative electron microscopy of III/V semiconductor nanostructures	36
Thomas Gemming HRTEM Image Calculations of Ionic and Hot Materials based on First-Principles and Molecular-Dynamics Simulated Structures	41
Susanne Stemmer Atomic resolution high-angle annular dark-field imaging of interfaces	45
Robert F. Klie Atomic resolution STEM and EELS analysis of defects and interfaces in functional nano-materials	47
Vincent Mauchamp <i>Ab initio</i> simulation of the Electron Energy-Loss Near-Edge Structures at the Li K-edge in Li, Li ₂ O and LiMn ₂ O ₄	50
Helmut Eschrig Orbital Polarization in Density Functional Theory	53

Stefaan Cottenier Magnetic Exchange Interactions in Magnetite	54
Monique Body Ab initio calculations of ^{27}Al quadrupolar parameters in fluoroaluminates	56
J. Manuel Perez-Mato Complex structural instabilities in ferroelectrics: soft modes and beyond	60
Xavier Rocquefelte The optical channel concept: a way to interpret the dielectric function	64
Eric L. Shirley Modeling excitation spectra of solids for electron scattering and other probes	68
Nathalie Vast Electronic excitations: <i>ab initio</i> calculations of electronic spectra and application to zirconia ZrO_2 , titania TiO_2 and cuprous oxide Cu_2O	72
Samuel B. Trickey Orbital-free density functionals and density models for driving molecular dynamics	73
David J. Singh Electronic Structure of Novel Oxides	74
Ján Ruzs Cancellation of probe effects in polarised positron annihilation experiment	76
Giulio Monaco Coherent double-plasmon excitations in aluminum studied by inelastic x-ray scattering	80
Gianluigi A. Botton Bonding and electronic structure of solids with EELS near-edge structures	82
 II Posters	
Poster 11: K. Hofmann and B. Albert Structure determination of boride carbides via calculated and experimental ELNES	87

Poster 12: J. S. Lin and W.-C. Chou Electronic properties of adsorbed InN on rutile (110) and anatase (101) surfaces	88
Poster 13: H. B. Abdallah and R. Bennaceur The electronic structure and chemical bounding mechanism in In ₆ S ₇	89
Poster 17: L. Chaput et al. Calculation of transport properties for thermoelectric materials	90
Poster 21: M. Diviš et al. Magnetic properties of NdNi ₂ B ₂ C from first principles calculations	91
Poster 23: Martin Zelený <i>Ab initio</i> study of Ni and Co thin films on (111) metallic substrates	95
Poster 24: C. Ducati et al. Nitrogen in highly crystalline multiwall carbon nanotubes	97
Poster 25: C. Ducati et al. Titanium oxide fullerenoids	98
Poster 27: J.-C. Zheng et al. Towards a new quantitative probing tool: merits of combining DFT and quantitative electron diffraction	101
Poster 28: G. Fronzoni et al. X-Ray absorption spectroscopy of alkaline-earth and transition metal oxides by Time Dependent Density Functional Theory	103
Poster 31: K. Tatsumi et al. Detection and high spatial resolution mapping of hydrogen in iron carbide systems	106
Poster 32: J. C. Le Bossé et al. Angular dependence of EELS spectra: cases of trichroism	110
Poster 34: V. J. Keast and M. Bosman DFT Calculations in Electron Energy Loss Spectroscopy (EELS): The low-loss part of the spectrum and optical properties	112

Poster 37: E. Stoyanov et al. Cr L_3 electron energy loss near-edge structures of Cr-bearing compounds: comparison between experiment and computation	116
Poster 39: K. Boulahya et al. Microstructural characterization of new phases in the Sr-Co-Ta-O system.	120
Poster 41: O. Rubel Annealing-induced exchange in nearest-neighbor atomic configurations of (GaIn)(NP) semiconductor alloys	122
Poster 43: M. Čák et al. Ab initio study of magnetism in rhodium	124
Poster 44: J. T. Titantah and D. Lamoen First-principles characterization of amorphous carbon nitride systems	125
Poster 45: J. T. Titantah and D. Lamoen Electronic and bonding structure of amorphous carbon and hydrogenated amorphous carbon: ELNES/XANES calculations and sp^3 bond fraction quantification	128
Poster 55: U. D. Wdowik et al. Lattice dynamics and electronic structure of cobaltous oxide	131
Poster 56: D. Lamoen et al. Structure refinement from first principles and electron diffraction: Ni_4Ti_3 precipitates in NiTi	132
Poster 57: D. Lamoen and J. T. Titantah Temperature effect on the electronic and optical properties of tetrahedral amorphous carbon.	134
Poster 58: C. Schuster and U. Schwindenschlögl Electronic structure calculations for YBCO/metal interfaces	136
Poster 60: A. Spessot et al. Characterization of displacement field in patterned nanostructures by TEM/CBED	137
Poster 61: L. Calmels et al. An ab-initio and experimental EELS investigation of alloying effects in TiC_xN_{1-x} compounds	140

Poster 63: S. Gemming et al. Atomistic Structure of Grain Boundaries determined by first-principles Calculations and Quantitative TEM	142
Poster 64: A. Siegel et al. Phase diagram of AlN from ab initio calculations	146
Poster 66: J. Verbeeck and G. Bertoni Interpreting Energy Filtered Diffraction Holography Experiments	148
Poster 67: A. N. Kravtsova et al. Nanosize effect on the electronic structure of AlN: X-ray absorption and DFT study	151
Poster 68: A. N. Kravtsova and D. Lamoen Study of SrTiO ₃ (001)/(SrTiO ₃) _m (LaAlO ₃) _n Layered Heterostructures by Energy Loss Near Edge Structure Spectroscopy	153
Poster 73: B. Warot-Fonrose et al. Accurate angular resolved EELS using the energy spectrum imaging technique	156
Poster 77: G. Bertoni and J. Verbeeck Quantifying experimental results using EELSMODEL: accuracy and precision	158
Poster 80: J. Houserová and M. Šob Ab initio Calculations of the Cr-based Laves Phases	160
Poster 81: C. M. McGilvery et al. ELNES as a Tool to Understanding the Chemistry of Interfaces in High-k Gate Stacks	161
Poster 83: D. Aubry and A.-L. Hamon Finite element method potentialities for ab-initio computations	165
Poster 84: K. Scheerschmidt and V. Kuhlmann Bond order potentials to include charge densities in TEM image interpretation	167
Poster 87: D. Legut and M. Šob Magnetism and ideal tensile strength in Ni ₃ Al and Fe ₃ Al	171

Poster 93: J. Buršík and P. Brož Analytical electron microscopy of Ni-Al-W alloys	172
Poster 94: W. Luo et al. Orbital-occupancy Ordering in Doped CaMnO ₃	175
Poster 98: A. Rother et al. Ab-initio simulation of the object exit wave of ferroelectrics	179
Poster 99: J.-O. Müller et al. Carbon Hybridization Determination in Soot and Carbon Black	180
Poster 100: F. Boucher et al. Electron energy-loss spectra calculations and experiments as a tool for the identification of a lamellar C ₃ N ₄ compound.	182
Poster 101: Z. Zanolli and U. von Barth InAs with wurtzite crystal structure: full-potential and pseudopotential ab-initio calculations	186
Poster 107: G. Hug Electronic structure of V ₂ AsC and Nb ₂ AsC and classification of the MAX phases	189
Poster 113: M.-G. Willinger et al. Investigation of vanadium oxide based catalysts by a combined DFT/TEM approach	192
Poster 117: M. R. Benam and H. A. R. Aliabad Theoretical studies of the effect of Ti, Zr and Hf impurities on the electrical properties of alpha-alumina	195
Poster 118: T. Galek et al. Ab initio study of metal induced gap states at Si/Al interface	199
Poster 135: P. Pongratz et al. Simulation of LACBED patterns of STI Structures for the Measurement of Strain in ULSI Devices	203
