RheoCon: International Conference on Rheology and Processing of Construction Materials
SCC: International Symposium on Self-Compacting Concrete
Rheology and Processing of Construction Materials

RheoCon2 & SCC9

Editors (view affiliations)
Viktor Mechtcherine, Kamal Khayat, Egor Secrieru

Conference proceedings
RheoCon 2019,
SCC 2019
Part of the RILEM Bookseries book series (RILEM, volume 23)
Influence of Waste Tire Rubber on Fresh and Hardened Properties of Self-Compacting Rubberized Concrete (SCRC)

Robert Bušić, Ivana Milčević

Pages 3-10

Novel Mix Design Methodology for Self-Compacting Steel-Fiber Reinforced Concrete Based on Rheological and Mechanical Concepts

Ángel de la Rosa, Elisa Poveda, Gonzalo Ruiz, Héctor Cifuentes

Pages 11-18
Innovative Use of Fine and Ultrafine GCC in Cementitious Systems
Pascal Gonnong, Philipp Mueller, Thomas Lys
Pages 19-26

Use of Surfactant to Improve Properties of Crumb Rubbers in Concrete Products
Marupatch Jamnongwong, Piti Sukontasukkul
Pages 27-35

Structural Build-Up of Cementitious Paste Under External Magnetic Fields
Dengwu Jiao, Khadija El Cheikh, Karel Lesage, Caijun Shi, Geert De Schutter
Pages 36-42

Influence of Aggregate Particle Size Distribution on Mixing Behavior and Rheological Properties of Low-Binder Concrete
Markus Samuel Rebmann, Rafael Giuliano Pileggi
Pages 43-51
Suspensions Sedimenting in a Horizontal Annulus – A Model for Oilfield Cements in Horizontal Wells
Agathe Robisson, Teresa Liberto, Elizabeth B. Dussan V.
Pages 52-59

SCC for Sub-Saharan Africa Based on Local Raw Materials – Material Development, Optimisation, and Application Concept
Wolfram Schmidt
Pages 60-67

Effect of Supplementary Cementitious Materials, Fillers and Chemical Admixtures on Rheology

Front Matter
Pages 69-69

Effect of Sodium Sulphate on Rheological Behaviour of Alkali Activated Slag Binders
Aparna Sai Surya Sree Nedunuri, Salman Muhammad
Pages 71-78

Bio-Derived Rheology Modifying Agents for Cement-Based Materials
Mahzad Azima, Zeynep Başaran Bundur
Pages 79-86

Influence of Cements Containing Calcareous Fly Ash on Rheological Properties of Fresh Mortars and Its Variability
Jacek Gołaszewski, Tomasz Ponikiewski, Aleksandra Kostrzanowska-Siedlarz
Pages 87-96

Early Properties of Portland Cements with Varied Set Regulators
Tamino Hirsch, Tobias Dorn, Dietmar Stephan
Pages 97-105
Influence of Different Accelerators on the Rheology and Early Hydration of Cement Paste

Sarah Leinitz, Zichen Lu, Simon Becker, Dietmar Stephan, Regine von Klitzing, Wolfram Schmidt

Pages 106-115

Effect of Mineral Additions on Rheology and Fresh Properties of Cement Pastes and Mortars

Dorota Małaszkiewicz, Mateusz Osipiuk

Pages 116-124

Effect of the Side Chain Density and Length of Polycarboxylate Ether Superplasticizers on the Thixotropic Structural Build-Up of Cement Paste

David Nicia, Dirk Lowke

Pages 125-133
Interaction of Superplasticizers with Cement from the Point of View of Colloid Chemistry

Johann Plank, Manuel Ilg
Pages 134-141

Improvement of UHPFRC-Rheology by Using Circular Shape Memory Alloy Fibres

Maximilian Schleiting, Alexander Wetzel, Florian Gerland, Thomas Niendorf, Olaf Wünsch, Bernhard Middendorf
Pages 142-148

Laboratory and In-Situ Rheological Testing

The Use of Parallel-Plate Rotational Rheometry to Determine the Superplasticizer to be Used in Cement Pastes Admixtures

Livia B. Agostinho, Eugenia F. da Silva, Luciana A. Farias,
Alexandre C. Pereira
Pages 151-159

Rheology and Build-Up of Fresh SCC Pastes Evaluated with the Mini-slump Cone Test
Gonzalo Barluenga, Irene Palomar, Cynthia Guardia, Hugo Varela, Francisco Hernandez-Olivares
Pages 160-167

About the Influence of Shear-Induced Particle Migration and Sedimentation on the Measurement Results of Concrete Rheometers
Christian Baumert, Harald Garrecht
Pages 168-173

On-Board Concrete Rheology Measurements Using an In-Drum Sensor System: Early Stages
Xavier Berger, Pierre Siccardi, Robin Jean, Marc Jolin, Denis Beaupre, Benoît Bissonnette
Pages 174-181

Experimental Developments of the Squeeze Flow Test for Mortars

Pages 182-190

Measuring the Impact Behavior of Fresh Mortars by Pressure Mapping

Victor K. Sakano, Franco A. Grandes, Fábio A. Cardoso, Fábio L. Campora, Roberto C. O. Romano, Rafael G. Pileggi

Pages 191-199

Evaluation of Fresh Adhesive Mortars Through Various Rheological and Imaging Techniques

Alessandra L. Fujii-Yamagata, Fábio A. Cardoso, Anne Daubresse, Evelyne Prat, Mohend Chaouche

Pages 200-208
Evaluation of Structural Build-Up Rate of Cementitious Materials by Means of Constant Shear Rate Test: Parameter Study

Irina Ivanova, Viktor Mechtcherine

Pages 209-218

Comparing Phase Development and Rheological Properties of OPC Paste Within the First Hour of Hydration

Cordula Jakob, Daniel Jansen, Ursula Pott, Jürgen Neubauer

Pages 219-227

Challenges in Rheological Characterization of Cement Pastes Using a Parallel-Plates Geometry

Aida Margarita Ley-Hernández, Dimitri Feys

Pages 228-236
Correlation Between “Very Early” Age Fracture Performance and Evolution of Rheological Properties of High Performance Fiber Reinforced Cementitious Composites with Adapted Rheology

Francesco Lo Monte, Gabriele Zago, Marco Cucchi, Liberato Ferrara
Pages 237-245

Investigation of the Early Cement Hydration with a New Penetration Test, Rheometry and In-Situ XRD

Ursula Pott, Clemens Ehm, Cordula Jakob, Dietmar Stephan
Pages 246-255

Use of Combined Rheo-NMR to Investigate the Relationship Between the Molecular and Mechanical Properties of Early Cement Paste Hydration

Nonkululeko W. Radebe, Karl-Friedrich Ratzsch, Christopher O. Klein, Manfred Wilhelm
Pages 256-265
Calibration of ASTM C230 Cone for Measuring Flow Diameter of Self-flowing Mortar
According to the EFNARC Recommendation

Shamir Sakir, Sudharshan N. Raman, A. B. M. Amrul Kaish, Azrul A. Mutalib
Pages 266-272

Thixotropy-Dependent Form Filling Ability of Cement Paste

Mareike Thiedeitz, Thomas Kränkel, Christoph Gehlen
Pages 273-280

Mixing, Processing and Casting of Mortar and Concrete

Comparative Study on the Effect of Mixer Type on Properties of Self-compacting Mortar

Bart Craeye, Wim Bastiaens, Erik Coppens, Dirk Van Houdt,
Wilfried Gijbels, Thomas Rondou
Pages 283-293

Effect of Electromagnetic Pulsation on the Rheological Properties of Mortars During Pumping
Inka Dreßler, Patrick Varady, Hans-Werner Krauss, Dirk Lowke
Pages 294-302

Influence of Aggregate Volume Fraction on Concrete Pumping Behaviour
Shirin Fataei, Egor Secrieru, Viktor Mechtcherine
Pages 303-310

Effect of Mixing Procedure on the Rheological Properties and Hydration Kinetics of Portland Cement Paste
Danila Fabiane Ferraz, Ariane C. R. Martho, Elizabeth G. Burns, Roberto C. O. Romano, Rafael G. Pileggi
Pages 311-319
Development of SCC Placement Methodology for the Monolithic Construction of Slab-to-Wall Members Using Formwork Pressure and Time of Set-Based Modeling

Boris Haranki, Ufuk Dilek
Pages 320-328

Influence of Segregation on Materials Component in Fresh Concrete Due to Vibration

Kazuaki Nishimura, Yoshitaka Kato
Pages 329-337

Study of the Mixing Completion in Concrete Production by Means of an on-Board Sensor System

Pierre Siccardi, Xavier Berger, Robin Jean, Marc Jolin, Benoît Bissonnette, Denis Beaupré
Pages 338-345

Pumping Process of High Strength Self-consolidating Concrete in the Construction of Skyscraper
Peiyu Yan, Jianguo Han, Mengyuan Li, Yu Liu
Pages 346-352

Additive Manufacturing and 3D-Printing

Front Matter
Pages 353-353

Hardened Properties of 3D Printable Ultra-High Performance Fiber-Reinforced Concrete for Digital Construction Applications

Ravendran Arunothayan, Behzad Nematollahi, Shin Hau Bong, Ravi Ranade, Jay Sanjayan
Pages 355-362

Properties of 3D-Printable Ductile Fibre-Reinforced Geopolymer Composite for Digital Construction Applications

Shin Hau Bong, Behzad Nematollahi, Ming Xia, Ali Nazari, Jay
Rheology of 3D Printable Lightweight Foam Concrete Incorporating Nano-Silica
Seung Cho, Jacques Kruger, Algurnon van Rooyen, Stephan Zeranka, Gideon van Zijl
Pages 373-381

Study on the Influence of Accelerators on the Hydration of Portland Cement and Their Applicability in 3D Printing
Tobias Dorn, Tamino Hirsch, Dietmar Stephan
Pages 382-390
